SIMS PRO

School Information Management System
Professional Product Catalog | 1tokLab Technology

The image shows the front cover of the SIMS PRO product catalog. At the top left, it says '1tokLab TECHNOLOGY PRESENTS'. The main title 'SIMS PRO' is in large green letters, followed by 'School Information Management System' and 'Smarter School Management. Better Schools. Brighter Future.' Below this is a paragraph describing SIMS Pro as a complete digital platform. To the right, there's a logo for '1tokLab TECHNOLOGY' with the tagline 'Building Smarter Schools for the Future'. The central part of the cover features a laptop and a tablet displaying the SIMS Pro interface. Below the devices, there are two sections: 'KEY FEATURES' with icons for Student Registration & Records, Attendance Management, Assessment & Academic Reporting, ID Card Generation, Staff & User Management, Student Promotion & Transfers, School Reports & Analytics, Parent Communication Support, Role-Based Access Control, and Offline & Online Compatibility. To the right of these is a 'BENEFITS' section with five green checkmarks: Reduce paperwork and administrative workload, Improve accuracy of student data, Generate reports instantly, Strengthen school accountability, and Secure centralized records management. At the bottom, there are two call-to-action buttons: 'GO DIGITAL. GO SMART. GO SIMS PRO!' and 'BOOK A FREE DEMO TODAY!'. The footer contains contact information: PHONE +675 71712882, WHATSAPP +675 83334255, EMAIL info@1toklab.com, WEBSITE www.1toklab.com, and a location pin for Papua New Guinea.

1tokLab TECHNOLOGY PRESENTS

SIMS PRO

School Information Management System

**Smarter School Management.
Better Schools. Brighter Future.**

8. Our Vision

Empowering Education Through Digital Innovation

We believe every school deserves efficient, reliable and intelligent digital systems that improve learning environments, strengthen administration and support institutional excellence.

Why Choose SIMS Pro?

- ✓ Purpose-built for school administration
- ✓ Designed for PNG operating realities
- ✓ Centralizes critical student and school information
- ✓ Supports accountability and faster reporting
- ✓ Scalable from individual schools to wider education deployments
- ✓ Backed by implementation, training and technical support from 1tokLab Technology

1tokLab Technology - Building Smarter Schools for the Future

1. Product Overview

SIMS Pro is a complete School Information Management System developed by 1tokLab Technology to help schools manage student information, attendance, assessment, academic reporting, staff records, communication and operational reporting from one integrated digital platform.

The system is designed to reduce administrative workload, improve the accuracy of school records and provide school leaders with faster access to reliable information for planning, reporting and accountability.

Built for PNG Schools

SIMS Pro is designed with local school realities in mind, including low-connectivity environments, practical administrative workflows, mobile access and affordable implementation models.

Core Value Proposition

- ✓ One centralized platform for key school administration functions
- ✓ Faster access to student, academic and operational information
- ✓ Reduced dependence on manual registers, spreadsheets and fragmented records
- ✓ Improved reporting, accountability and institutional continuity
- ✓ Flexible use in offline and online operating environments

Who SIMS Pro Is For

- Primary schools
- Junior high schools
- Secondary schools
- Technical and vocational institutions
- Provincial education divisions
- District education offices

2. SIMS Pro Key Features

Student Registration & Records

Create and maintain structured student profiles, enrolment details and essential school records in one centralized system.

Attendance Management

Record and review student attendance efficiently, helping schools identify attendance patterns and improve monitoring.

Assessment & Academic Reporting

Manage assessment records and generate structured academic reports with greater consistency and speed.

ID Card Generation

Produce student identification cards from registered student information, improving identification and record consistency.

Staff & User Management

Maintain staff and user records with controlled access according to assigned responsibilities.

Student Promotion & Transfers

Support student progression between grade levels and manage transfers while preserving record continuity.

School Reports & Analytics

Generate operational and academic information for school leadership, boards and education authorities.

Parent Communication Support

Support improved communication workflows between schools, parents and guardians.

Role-Based Access Control

Restrict system functions and information according to authorized user roles.

Offline & Online Compatibility

Support schools operating in low-connectivity settings while allowing online use where connectivity is available.

7. Standard Annual Licence Fees

Affordable annual licensing scaled to the size and type of each school.

All fees are charged per school, per year.

Choose the category that matches your institution type.

School Category	Annual Licence Fee
ECE / Primary Schools	K300
Junior High / Large Primary Schools	K600
Secondary Schools / VET Institutions	K1,200
Large Secondary / FODE Schools	K2,500

A Practical Investment in Better School Management

The annual licence gives schools continued access to SIMS Pro for structured student records, attendance, assessment, reporting and school administration.

Contact 1tokLab Technology to confirm your category and arrange a demonstration.

6. Designed for PNG School Realities

SIMS Pro is developed around the practical realities faced by many schools in Papua New Guinea. The aim is not simply to digitize existing paperwork, but to make school administration easier, more reliable and more sustainable.

Low-connectivity environments

Designed to remain practical where internet connectivity is limited or inconsistent.

Practical workflows

Administrative functions are organized around common school tasks rather than complex enterprise processes.

Simple user experience

Interfaces are designed to be understandable for users with different levels of digital experience.

Mobile compatibility

Supports access on compatible mobile devices for greater flexibility.

Affordable implementation

Deployment can be scaled to the needs and operating context of individual schools or education authorities.

Local support orientation

Training, implementation and product development are focused on the PNG education environment.

3. Benefits for School Leaders

Reduce Administrative Workload

Digitized workflows reduce repetitive paperwork and help staff complete routine administrative tasks more efficiently.

Improve Data Accuracy

Centralized student and school records reduce duplication, inconsistencies and errors associated with fragmented manual records.

Generate Reports Faster

School leaders can access and prepare reports more quickly using information already captured in the system.

Strengthen Accountability

Structured records and controlled user access support better oversight, monitoring and administrative accountability.

Secure Centralized Records

Important institutional records are organized within a managed system rather than scattered across individual files and devices.

Support Better Decisions

Timely access to student and school information supports evidence-based planning and management decisions.

4. Value for Education Authorities

SIMS Pro can support broader digital transformation when deployed across multiple schools, districts or provinces. A standardized school information platform can strengthen monitoring, reporting and data consistency across the education system.

Strategic Area	Education System Value
Standardized school data systems	Promotes consistent administrative structures and reporting practices across participating schools.
Improved monitoring and compliance	Supports more systematic review of school information, records and reporting requirements.
Better decision-making through data	Provides education leaders with more timely and structured information for planning and resource decisions.
Province-wide digital transformation	Can be deployed progressively across schools to establish a common digital administration environment.
Improved continuity of records	Helps preserve institutional information despite staff movement, leadership changes or physical document loss.

A Practical Deployment Model

- ✓ Pilot deployment in selected schools
- ✓ School administrator and user training
- ✓ Data setup and workflow configuration
- ✓ Progressive expansion by district or province
- ✓ Ongoing technical support and system upgrades

5. Implementation & Support

1tokLab Technology provides implementation support designed to help schools move from manual or fragmented processes into a practical digital operating environment.

System Installation & Setup

Configure SIMS Pro for the institution and prepare the system for operational use.

User Training

Orient school leaders, administrators and authorized users to system workflows and responsibilities.

Technical Support

Provide assistance for implementation issues, user support and operational continuity.

System Customization

Adapt selected workflows or institutional requirements where appropriate.

Continuous Upgrades

Maintain and improve the system as product capabilities develop.

Deployment Support

Support district, provincial or multi-school rollout planning and implementation.

Implementation Principle

Technology adoption succeeds when the system is practical, users are trained, responsibilities are clear and school leadership actively supports the transition.
